## TECHNICAL SKILLS

---

**Languages:** Java, C/C++, JavaScript

**Tools/Platform:** Docker, Postman, Git, GitHub, VS Code, IntelliJ

**Technologies/Frameworks:** Spring Boot, Node.js, Express.js, Kafka, REST APIs

**Cloud/Databases:** SQL, MongoDB, Redis

## Projects

---

### Distributed E-Commerce Backend

 [GitHub Link](#)

- **Problem:** Traditional monolithic systems struggled to scale independently and suffered from tight coupling between services.
- **Impact:**
  - \* Designed and implemented microservices for product, order, user, and notification domains.
  - \* Used Kafka for decoupled, asynchronous communication between services, enhancing system reliability.
  - \* Secured endpoints using OAuth2 with Keycloak; centralized API routing via Spring Cloud Gateway.
  - \* Enabled fault tolerance using Resilience4j and integrated observability with Micrometer + Prometheus.
  - \* Deployed the entire stack on Kubernetes with Docker containers for production-grade orchestration.
- **Tech Stack:** Spring Boot, Kafka, Docker, Kubernetes, Spring Cloud Gateway, Keycloak, Prometheus, Resilience4j

### Spring Boot E-Commerce API

 [GitHub Link](#)

- **Problem:** Needed a secure backend to handle user authentication, product management, orders, and real-time payment processing.
- **Impact:**
  - \* Built robust REST APIs using a three-layer architecture (Controller, Service, Repository).
  - \* Implemented JWT-based authentication with role-based access and cookie-based session persistence.
  - \* Integrated Stripe payment links with dynamic generation for order checkout.
  - \* Documented APIs using Swagger to aid collaboration and manual testing.
  - \* Packaged the application as a Docker container and deployed it on Render.
- **Tech Stack:** Spring Boot, MongoDB, JWT, Stripe, Swagger, Docker, Maven

### Shopify – MERN Stack E-Commerce App

 [GitHub Link](#)

- **Problem:** Small retailers lack accessible, full-stack e-commerce platforms with integrated payments and media handling.
- **Impact:**
  - \* Built a fully functional shopping platform using MERN stack with a clean UI and secure login.
  - \* Used JWT for protected routes and user sessions across client and server.
  - \* Integrated Multer for uploading product images with validation and cloud storage support.
  - \* Enabled dual-payment options using Stripe and PayPal for flexible transactions.
  - \* Tested backend endpoints extensively using Postman to ensure API stability.
- **Tech Stack:** MongoDB, Express.js, React, Node.js, JWT, Multer, Stripe, PayPal, Postman

### LangChain-Powered PDF Chatbot – RAG-based Document QA

 [GitHub Link](#)

- **Problem:** Users struggle to find contextual answers in large PDF files manually.
- **Impact:**
  - \* Developed an intelligent chatbot that answers user queries from PDFs using LangChain4j and semantic search.
  - \* Generated vector embeddings using MiniLM for high-quality context-aware matching.
  - \* Integrated Google Gemini API for generating natural language responses.
  - \* Maintained user sessions and history using in-memory storage for multi-turn conversations.
- **Tech Stack:** Spring Boot, LangChain4j, MiniLM, Google Gemini API, Vector DB

EXPERIENCE

| <i>Teaching Assistant Intern</i>                                                                                                                                                                                                                                                                                                                                                        | <i>Noida, UP</i>           |
| <ul style="list-style-type: none"><li>• Collaborated with fellow teaching assistants to provide comprehensive support to students.</li><li>• Recognized as the top-performing teaching assistant in the batch for consistently delivering high-quality assistance to students.</li><li>• Guided and mentored students in their coursework, including assignments and projects</li></ul> |                            |

ACHIEVEMENTS

- Solved over 2000+ DSA problems
- Global rank 201 in Leetcode (Weekly Contest 307)
- Global rank 217 in Leetcode (Weekly Contest 217)
- Max 1802 rating on Codechef
- Max 1624 rating at Codeforces
