EDUCATION

Bhilai Institute of Technology

Master of Computer Applications

Durg, CG

August 2024 – May 2026

EXPERIENCE

Web development and Data analyst Intern

May 2025– June 2025

National Institute of Technology Raipur

Onsite

- Designed and developed the CMahanadi River basin management website with my team.
- Designed interactive dashboards using **Power BI** by extracting Groundwater report, enhancing decision-making.

PROJECTS

LangChain-Powered PDF Chatbot– RAG-based Document QA | | GitHub

June 2025

- Developed an intelligent chatbot that answers user queries from PDFs using LangChain4j and semantic search.
- Generated vector embeddings using MiniLM for high-quality context-aware matching.
- Integrated Google Gemini API for generating natural language responses.
- Maintained user sessions and history using in-memory storage for multi-turn conversations.
- **Tech Stack:**** SpringBoot, LangChain4j, MiniLM, GoogleGeminiAPI, VectorDB.

Jarvis: A virtual Assistant | *Python* , *API*| GitHub

March 2025

- Developed a voice-controlled virtual assistant, "Jarvis," using Python, capable of performing tasks like opening websites, playing music, and fetching the latest news using the NewsData.io API.
- Integrated Google Gemini API to process user queries and provide intelligent, concise responses using natural language processing.
- Implemented text-to-speech functionality with gTTS and Pygame, enabling Jarvis to interact with users through spoken responses

AI ChatBot | *React, Vite, Node.js, MongoDB, JWT, Google Gemini API* | GitHub

May 2025

- Built a ChatGPT-like AI chatbot using the MERN stack (MongoDB, Express, React, Node.js), integrating the Google Gemini API for intelligent responses and securely storing user chats and sessions in MongoDB.
- Designed a custom authentication and authorization system using JWT tokens, HTTP-only cookies, and route protection, ensuring secure user access and session management.
- Developed a responsive and user-friendly chat interface with React (powered by Vite) and Material UI, delivering a modern and seamless user experience across devices.

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, C/C++, SQL, Postgres, JavaScript, HTML, CSS, TypeScript

Frameworks: Android SDK, React.js, Node.js, Express.js, MongoDB, Next.js, Spring Boot, Flask

Tools and Devops: Git, Kubernetes, Docker, CI/CD, Android Studio

APIs Protocols: Rest API, JWT, Axios/Fetch

Libraries: Pandas, NumPy, Matplotlib

ML RAG: PyTorch, LangChain (RAG/semantic-search pipelines)

ACHIEVEMENTS

- President of Student Council, Lead a team of Class Representatives of my Undergrad college.
- Treasurer of AMCA, managing budgeting, financial planning, and fund allocation for events and initiatives while maintaining transparent financial records.
- Co-ordinator of TechnoHub club, facilitating technical events, workshops, and student engagement initiatives to enhance employability and industry readiness.
- Partipated in several Hackathons, which Included IIT Bhilai Youth conclave, HackIndia 2025, and worked as a team player for my team, in HackIndia, my team fought with 85 teams and made it into the top-11 teams in the final round.
